## PURPOSE OF THE AMERICAN ECONOMIC ASSOCIATION

The American Economic Association is an organization composed of persons interested in the study of political economy or the economic phases of political and social questions. As may be seen by examining the list of members printed in this supplement, not only are all the universities and the most prominent colleges in the country represented in the Association by their teachers of economics and related subjects, but a large number of members come from among businessmen, journalists, lawyers, men in public life, and others interested in economic principles, or, more often, in their applications to social life. The Association has, besides, a growing representation in foreign countries.

The annual meetings, usually held during the Christmas holidays, are arranged as forums for the discussion of scientific questions and problems of social and economic policy. They give opportunity for contact and general understanding among teachers, students, and businessmen interested in such questions. The meetings aim to counteract any tendency to particularism which geographical separation and diverse interests might otherwise foster.

The publications of the Association were begun in March, 1886. The first series of eleven volumes was completed by a general index in 1897. The second series, comprising two volumes, was published in 1897-99, and in addition thereto the Association issued during 1896-99 four volumes of *Economic Studies*. In 1900 a third series of quarterly publications was begun with the Papers and Proceedings of the Twelfth Annual Meeting, and was continued through 1910. *The Economic Bulletin*, issued quarterly and devoted to bibliography and current notes, was also published by the Association during the three years, 1908, 1909, and 1910.

In 1911 the Association began publishing the *American Economic Review*, a quarterly journal devoted to articles on economic subjects, reviews, abstracts of articles in current journals, and a classified bibliography of economic publications. During the thirty-four years of its existence, the *Review* has made a place for itself among the scientific journals of the country.

The American Economic Association is the organ of no party, sect, or institution. It has no creed. Persons of all shades of economic opinion are found among its members, and widely different views are given a hearing in its annual meetings and through its publications.

With the exception of the editor of the *American Economic Review* and the Secretary-Treasurer, the officers of the Association receive no remuneration for their services. Its entire receipts are expended for the editing, printing, and circulation of the publications and for the annual meetings.

## CHARTER AND BY-LAWS OF THE AMERICAN ECONOMIC ASSOCIATION

## EDITORIAL NOTE

The present edition of the biennial handbook of the Association contains the following information: lists of officers, past and present, charter and by-laws of the Association, a directory of members and a geographical enumeration of members and subscribers (with addresses), as of June 15, 1946, and statistical summaries.

This 1946 *Handbook*, with names and addresses of members and subscribers, does not follow in form the special-purpose "who's who" directories which were published in 1938 and in 1942. It is our plan to issue a directory in fuller form in 1948, before which time we hope to make further improvements in the classification of fields of economics. Our first thought was to delay publication of a revised directory until an improved classification could be adopted, but with the rapid changes occurring in our membership and subscription lists during the reconversion period, the publication of a simple handbook could not be further delayed.

Our Association is directly represented on the Social Science Research Council, the American Council of Learned Societies, and the National Bureau of Economic Research. Names of our representatives and of other officers and members of these organizations are presented.

Also of interest to our membership is the information contained at the end of the volume concerning the organization and activities of three regional economic associations with which many of our members are affiliated; namely, the Midwest Economic Association, the Southern Economic Association, and the Pacific Coast Economic Association.

The increasing amount and variety of inquiries received by this office prompt the Editor to include in this note the following summary of published sources of information concerning the activities of the Association:

1. *The American Economic Review*—a quarterly publication containing main articles, book reviews, bibliographical and personal notes, records of special investigations by individuals and public commissions.
2. *The Papers and Proceedings* of the annual meetings of the Association (edited by the Secretary)—main papers, round table summaries, together with reports of the Secretary, the Treasurer, the Editor, Finance Committee, Auditor, standing and special committees, minutes of the Executive Committee and of the business meetings. The appendix contains a cumulative list of the contents of the proceedings from 1911 and the publications of the Association since 1886.
3. *The Handbook*—a biennial publication, usually in the form of a directory containing names and addresses of members together with the year from which dates their continuous membership. In 1938 and 1942 specialized "who's who" directories were issued, containing information concerning the interests and activities of our members. The 1905 *Handbook* contained brief biographical sketches of members.
4. *Information Booklet*—describing the purposes, organization, and activities of the Association, designed to answer inquiries from prospective members. Sent free upon request.

#### Officers, 1946

*President*, John B. Condliffe, University of California. *Vice-President*, Hugh Jackson, Stanford University. *Secretary-Treasurer*, Morrison Handsaker, Occidental College. *Editor*, Jack Guthrie, State College of Washington.

The Pacific Coast Economic Association, under a somewhat different name, was established in 1922, largely through the efforts of Alfred C. Schmitt, Edwin C. Robbins, Stephen I. Miller and Eliot Jones. The first meeting was held in Portland, Oregon. Membership is of two kinds: (1) institutional members, originally confined to accredited universities and colleges west of the Rocky Moun-

tains, but now changed to include any educational institution approved by the Executive Committee, west of the Rockies; (2) individual members, who may be any person interested in the theory, principles and problems of economics and business. In addition to the professional economists, many Pacific Coast businessmen are members.

One of the principles of the P.C.E.A. is to devote approximately one-third or more of each annual conference to problems of the Pacific Slope; another is to co-operate with the efforts of the Social Science Research Council.

The membership of the Association as of December 31, 1941, was 222. Institutional dues are \$10.00 and \$5.00, depending upon size of the institution; individual membership is \$1.50 yearly. The principal publication is the annual proceedings.
